WE DO NOT JUST
PROVIDE **SOLUTIONS.**

WE PROVIDE INNOVATIONS
THAT DRIVE TOWARDS **GROWTH.**

WHAT WE DO

UNIQUE

INNOVATIVE IDEA

FOR EVERY CLIENT

Whether your business needs a CMS website, eCommerce website, a mobile/web/desktop application, or digital marketing services or graphics services; Insync will provide expert marketing insight, and a team of professional developers that are ON YOUR SIDE working to reach your goals.

OUR SERVICES

Website Design and Development

Websites are your digital identity. The first impressions count. We design modern websites, that is supported by all devices and platforms. How your website appears determines whether a potential customer will want to establish a relationship with you.

Ecommerce Development

Give your customers a seamless, integrated shopping experience. Work with us to re-platform or build a profitable, conversion-focused website.

Application Development

Automate your business processes. Get unique web, desktop or mobile applications that bring your vision to life and transform the way your business works.

Graphics and Multimedia Designing

We provide you with brand identity from logo designs, brochure design, stationary design etc. Our graphical services support in addition includes print media, magazine designs, brochures, leaflets, flyers and info-graphics, posters, digital signage.

Digital Marketing

We can help your online presence be found! Our team is trained and has experience with nearly every form of Internet marketing – from search engine optimization to social media marketing. We'll make sure that our effort drives results and brings in real customers.

Offshore Tech/Data Support

Our well qualified and experienced technical team provides support from data processing, data management, data entry through trouble shooting and Quality testing.

OUR PRODUCTS

INTAB ERP is an ERP suite to cater to hospital ERP needs. Presently developed for medical clinics, the suite provides both clinical as well as patient care aspects to a hospital management. The software is divided into different modules, each addressing a specific activity of the hospital and thereby facilitating better patient care. The ERP can be customized to suit your business cases and needs. INTAB ERP is still being revised with more add-on features and modules to make it more powerful and a one stop solution that cater to the needs of various business sectors.

ProgresEEv is a Hiring and Retention tool that has no equal. The tool distinguishes what the company wants in an employee from what the employee wants in a company and helps to integrate both in the workplace. The uses for ProgresEEv are not limited to the hiring process. It is amazingly useful for employee performance reviews. It provides pre-hire baseline data that serves to set specific and meaningful annual goals for the company and the employee, and identify new ways to increase the percentage of good hires while strengthening employee retention and satisfaction. All of which leads to increased employee productivity.

WHO WE ARE

We are a seasoned team of software developers, UX designers, quality engineers and product managers who love solving hard problems in simple, elegant, and scalable ways. We work with companies to create new products and services and manage the inherent risk that comes with innovation.

Located in Cochin India, we have worked hard and smart to reach where we are today with a passion to create wonders with technology. We believe in using technology for social cause. We offer discounted rates for non profits and projects that involves socially relevant issues, social injustices or education.
